

Innovative Methods and Metrics for Agriculture and Nutrition Actions (IMMANA) is a new research initiative funded by the UK Department for International Development (DFID). IMMANA aims to accelerate the development of a robust scientific evidence base needed to guide changes in global agriculture and food systems to feed the world's population in a way that is both healthy and sustainable.

What we do: IMMANA consists of three inter-related workstreams

IMMANA Grants

IMMANA Grants aim to accelerate the development of innovative interdisciplinary methods, metrics, and tools to fill key knowledge gaps in agriculture-food systems and nutrition research.

IMMANA Fellowships

IMMANA Fellowships aim to build a cadre of early career researchers in agriculture and food systems, nutrition, and health research.

Agriculture, Nutrition and Health Academy

ANH Academy is a global research network in agriculture and food systems for improved nutrition and health to serve as a platform for learning, sharing and collaboration.

<http://immana.lcirah.ac.uk>

The Agriculture, Nutrition & Health (ANH) Academy is a global research network in agriculture and food systems for improved nutrition and health to serve as a platform for learning and sharing.

Objectives

The objectives of the Academy are to:

1. Share innovative research in agriculture and food systems for improved nutrition and health;
2. Stimulate the development and harmonisation of new research;
3. Help strengthen the capacity of the research community to undertake inter-sectoral and interdisciplinary research;
4. Facilitate the uptake of robust evidence in policies and programming in agriculture and food systems for improved nutrition and health.

Get involved

Any researcher working at the intersection of agriculture and food systems, nutrition and/ or health can apply to become a member of the Academy. Membership is free of charge.

Our activities:

- Thematic working groups
- An annual ANH Academy Week (conference plus training)
- Face-to-face and online training
- An online platform for interaction
